License Types

After installation, OnyxCeph³™ runs in a trial mode until the software is authorized by registration. In the trial mode, all functionality available in version 3D Pro can be used and evaluated except printing and findings exchange. The limitation is in the number of patients (max. 10) and images/findings (max. 100) including the pre-installed demo data. No data can be deleted in the trial mode and a nasty nag window will appear more or less frequently.

Note: The trial mode allows testing features of the software by test cases but may not be used for diagnostics or treatment planning for real cases or any other commercial purpose. Without registration, OnyxCeph³™ has no CE approval as a medical product.

For registration, two license types are available for each software version - perpetual and non-perpetual. Perpetual licenses RL+ give customers the right to use the software forever, after the license fee was paid. Non-perpetual licenses OSL are subscription-like, requiring the user to renew their authorization after the license payment period expires. Software support (Updates, Hotline) which is identically for both license types has to be paid separately on an annual base.

In case of switching license type from Open Subscription (OSL) to Perpetual (RL+), a discount of 50% of all license fee paid before is granted for a maximum of 5 years.

For both license types, an annual maintenance fee for updates and upgrades is mandatory which costs EUR 99 per year plus VAT (if applicable).

Open Subscription (OSL)

Annual License Fee +
Annual Maintenance Fee

Perpetual License (RL+)

One-off License Fee +
Annual Maintenance Fee
